

Highlights

Among the reported diseases, **AGE** is the leading cause of morbidity in Week 26 with **654 reported cases.**

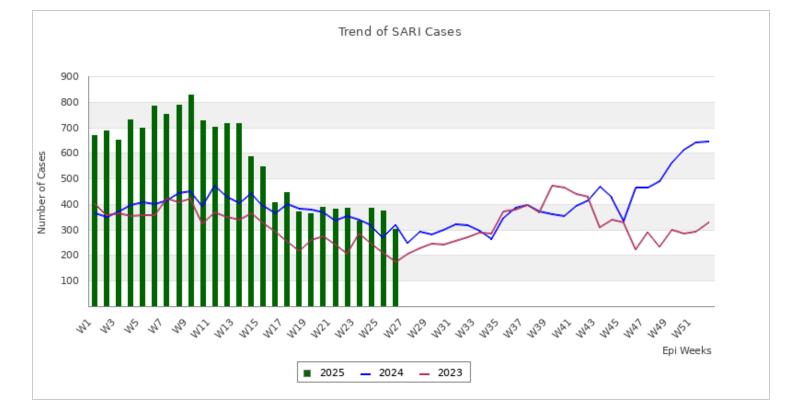

Overall reporting rate of Week 26 is 97.0% with 130 out of 134 sentinel sites reporting to EWARS.

This bulletin includes data since January 2022 till date, including comparison of the same period last two year. In May 2019, 36 new sentinel sites (including public hospitals, private hospitals, and medical colleges) were added and was gradually oriented and started reporting. Recently, in November 2024, 17 reporting sites selected from all the provices of Nepal were upgraded to sentinel sites, thus the number of sentinel sites are increasing. The current number of sentinel sites is 134.

Trend of Outbreak Prone Diseases/Syndromes

Comparative Analysis by Disease/Syndrome (Week 26, 2025)

Disease	Week 25, 2025 (Previous Week)	Week 26, 2025 (This Week)	Change in No. of Cases		Week 26, 2024 (Last Year Same Week)
AGE	760	654	-106	•	651
SARI	376	301	-75		319
Cholera	1	0	-1		1
Dengue	81	72	-9		92
Kala azar	3	5	2		5
Malaria	3	5	2		2
Increase in number of cases		Decrease in number of of	cases 🔹 No cha		ange in number of cases

Summary Observation (including probable and suspect cases)

Most of the **AGE** cases were reported from KATHMANDU (78 cases), PARSA (40 cases), LALITPUR (34 cases), BHAKTAPUR (29 cases) and ARGHAKHANCHI (21 cases).
