

Early Warning and Reporting System (EWARS)

Weekly Bulletin

(20th Epidemiological Week)

26 May 2019

Government of Nepal
Ministry of Health and Population
Department of Health Services
Epidemiology and Disease Control Division
Kathmandu, Nepal
ewarsedcd@gmail.com

This bulletin includes the updates from the Early Warning and Reporting System (EWARS). It includes data since January 2019 till date, including comparison of same period during last year.

The Early Warning and Reporting System (EWARS)

Highlights

AGE: 254 cases of AGE are reported this week. The majority of these cases are from Dolakha (28 cases), Achham (27 cases), Kailali (18 cases), Kapilvastu (14 cases) and Dhading (13 cases).

SARI: 148 cases of SARI are reported this week. The majority of these cases are from Kathmandu (18 cases), Lalitpur (16 cases), Dolakha (11 cases), Sindhupalchowk (10 cases) and Morang (10 cases).

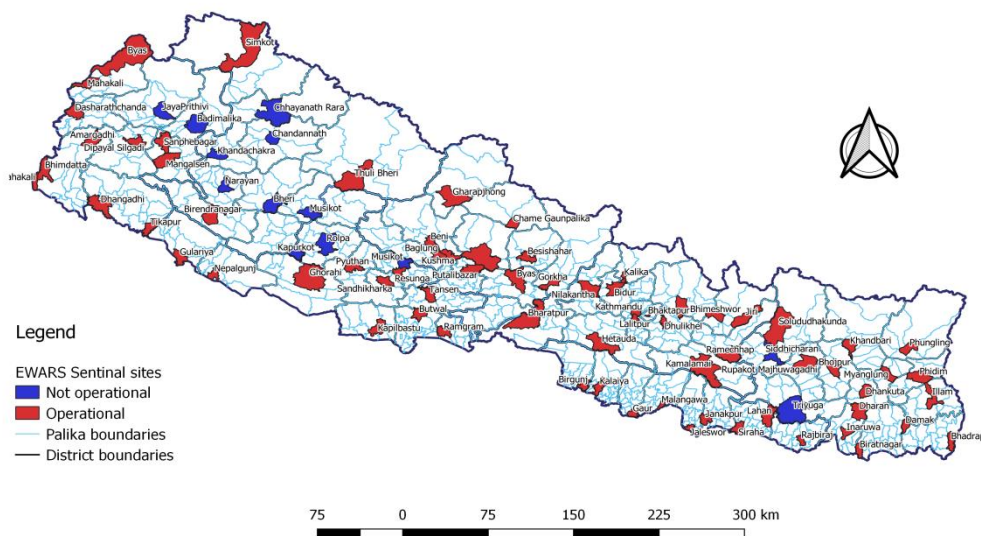

Dengue: One case of Dengue is reported this week by Teku hospital, Kathmandu and the case was from Mahottari.

Kala-azar: Five cases of Kala-azar are reported this week, two from Banke and one each from Makwanpur, Palpa and Siraha.

The EWARS was established in 1997 to strengthen the flow of information on vector-borne and other outbreak prone infectious diseases from the district to Epidemiology and Disease Control Division (EDCD) and Vector-Borne Disease Research and Training Center (VBDRTC), Hetauda. Rapid Response Teams (RRTs) can be mobilized at short notice to facilitate prompt outbreak response at Central, Regional and District level. RRTs can also support local level health institutions for investigation and outbreak control activities.

This information system is hospital-based and is currently operational in 71 hospitals throughout Nepal (Figure 1). So far, the EWARS mainly focuses on the **weekly reporting** of number of cases and deaths (including "zero" reports) of six priority diseases/syndromes—Malaria, Kala-azar, Dengue, Acute Gastroenteritis (AGE), Cholera and Severe Acute Respiratory Infection (SARI), and other epidemic potential diseases/syndromes (like enteric fever). It equally focuses on **immediate reporting** (to be reported within 24 hours of diagnosis) of one confirmed case of Cholera, Kala-azar severe and complicated Malaria and one suspect/clinical case of Dengue as well as 5 or more cases of AGE and SARI from the same geographical locality in one-week period.

EWARS Sentinel Sites

Reporting Status

Out of 71 functional EWARS sentinel sites, report was received from 45 sentinel sites (63%) whereas 26 sentinel did not report in the 20th epidemiological week of 2019. The reporting coverage has slightly decreased compared to the last week.

1.1 Acute Gastro-Enteritis and Cholera

254 cases of AGE are reported in the 20th epidemiological week this year. The majority of these cases are from Dolakha (28 cases), Achham (27 cases), Kailali (18 cases), Kapilvastu (14 cases) and Dhading (13 cases). 475 cases of AGE were reported this week in 2018.

Cholera: One case of Cholera has been reported so far this year by Teku hospital, Kathmandu and the case was from Tahachal, Kathmandu.

1.2 Severe Acute Respiratory Infection (SARI)

148 cases of SARI are reported in the 20th epidemiological week this year. The majority of these cases are from Kathmandu (18 cases), Lalitpur (16 cases), Dolakha (11 cases), Sindhupalchowk (10 cases) and Morang (10 cases). 195 cases of SARI were reported this week in 2018.

1.3 Enteric Fever

31 cases of Enteric fever are reported this week. The majority of the cases are from Kaski (4 cases), Dolakha (3 cases) Chitwan (2 cases) and Dang (2 cases).

1.4 Malaria

No case of Malaria is reported this week. No case of Malaria was reported this week in 2018.

1.5 Dengue

One case of Dengue is reported this week by Teku hospital, Kathmandu and the case was from Mahottari. No case of Dengue was reported this week in 2018.

1.6 Kala-azar

Five cases of Kala-azar are reported this week, two from Banke and one each from Makwanpur, Palpa and Siraha. Four cases of Kala-azar were reported this week in 2018.

1.7 Scrub typhus

Two cases of Scrub typhus are reported this week, one each from Gorkha and Kathmandu.

Timeliness and completeness of reporting from sentinel sites:

Code	Sentinel Sites	Timeliness (This Week)	Completeness (%)	Code	Sentinel Sites	Timeliness (This Week)	Completeness (%)
101	Mechi ZH, Jhapa	No Reporting	95	138	DH, Solukhumbu	No reporting	20
