This bulletin includes the updates from the Early Warning Reporting System (EWARS). It includes data since January 2018 till date, including comparison of same period during last year.

Section 1: The Early Warning and Reporting System (EWARS)

Highlights

- **Kala-azar:** Two cases of Kala-azar are reported this week, one each from Lumbini Zonal Hospital, Rupandehi and District Hospital, Sarlahi. The cases are from Rainadevi Chhahara Rural Municipality of Palpa district and Ishwarpur Municipality of Sarlahi district respectively.
- **Scrub Typhus:** One case of Scrub Typhus is reported this week from United Mission Hospital, Palpa and the case is from Rambha Rural Municipality of Palpa district.
- **Dengue:** No case of Dengue is reported this week.
- **Malaria:** No case of Malaria is reported this week.
- No death from AGE and SARI is reported this week.

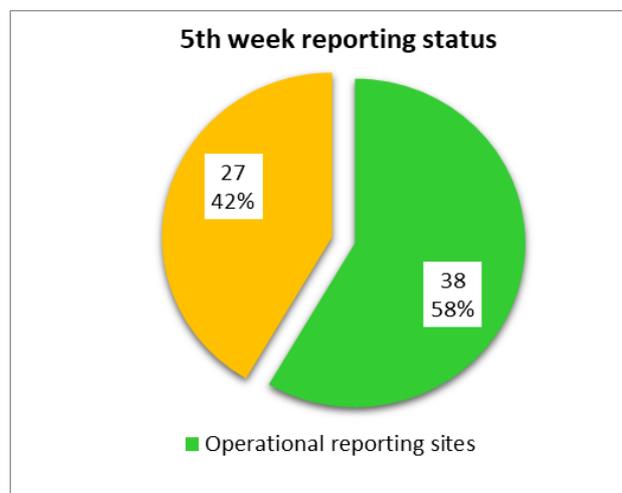

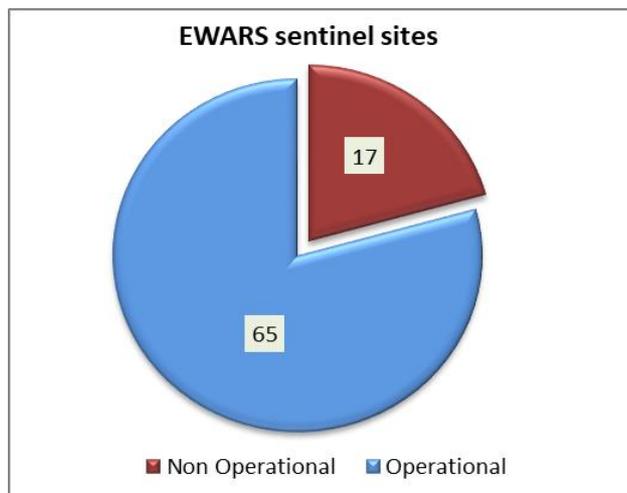

The EWARS was established in 1997 to strengthen the flow of information on vector-borne and other outbreak prone infectious diseases from the district to Epidemiology and Disease Control Division (EDCD) and Vector-Borne Disease Research and Training Center (VBDRTC), Hetauda. Rapid Response Teams (RRTs) can be mobilized at short notice to facilitate prompt outbreak response at Central, Regional and District level. RRTs can also support local level health institutions for investigation and outbreak control activities.

This information system is hospital-based and is currently operational in 65 hospitals (out of 82 sites) throughout Nepal (Figure 1). So far, the EWARS mainly focuses on the **weekly reporting** of number of cases and deaths (including "zero" reports) of six priority diseases/syndromes—Malaria, Kala-azar, Dengue, Acute Gastroenteritis (AGE), Cholera and Severe Acute Respiratory Infection (SARI), and other epidemic potential diseases/syndromes (like enteric fever). It equally focuses on **immediate reporting** (to be reported within 24 hours of diagnosis) of one confirmed case of Cholera, Kala-azar severe and complicated Malaria and one suspect/clinical case of Dengue as well as 5 or more cases of AGE and SARI from the same geographical locality in one week period.

Reporting Status

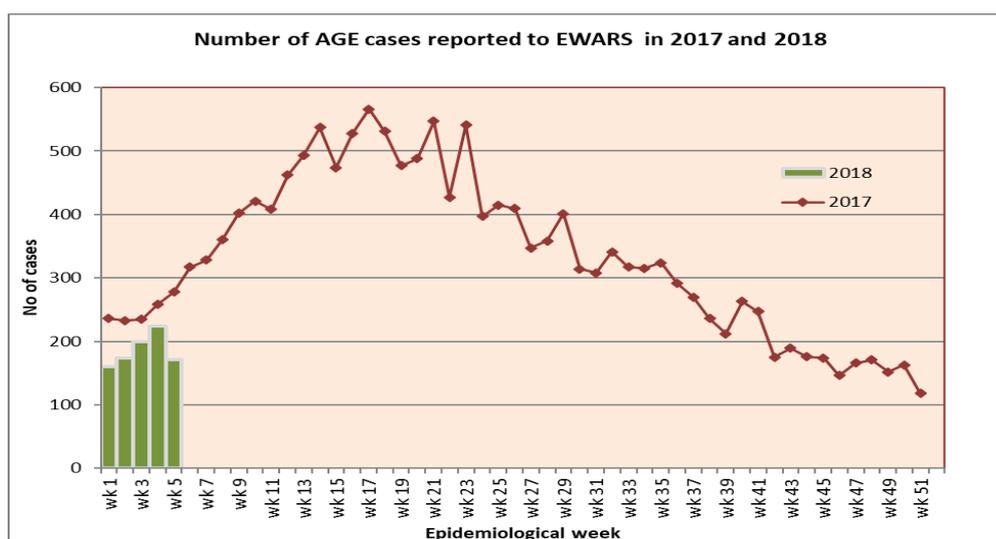

Out of 65 functional EWARS sentinel sites, report was received from 38 sentinel sites (58 percent) whereas 27 sentinel sites did not report in 5th Epidemiological week of 2018. The reporting coverage is increased as compared to previous week.

1.1 Acute Gastro-Enteritis and Cholera

171 cases of AGE are reported in 5th epidemiological week of 2018. Among 171 cases, the majority of cases are from Panchthar (19 cases), Achham (19 cases), Dolakha (14 cases), Illam (11 cases), Jhapa (10 cases), Morang (10 cases), Kathmandu (8 cases), Pyuthan (8 cases), Lalitpur (6 cases) and Sarlahi (5 cases) district. The number of AGE cases reported in 5th week this year did not exceed the number of AGE cases reported in the same week last year (278 cases).

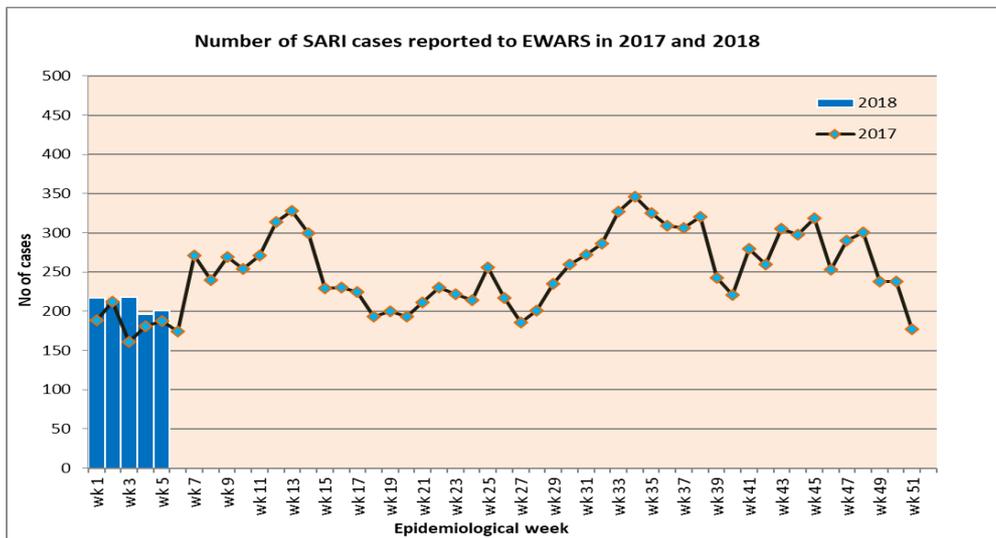

No death from AGE is reported this week. 2 deaths from AGE are reported so far this year. Twenty deaths from AGE were reported in 2017.

1.2 Severe Acute Respiratory Infection (SARI)

201 cases of SARI are reported in 5th epidemiological week of 2018. The cases of SARI reported this slightly exceed the number reported in the same week last year (188 cases). Among 201 cases, the majority of cases are from Rupandehi (29 cases), Jhapa (23 cases), Morang (20 cases), Lalitpur (11 cases), Palpa (11 cases), Kanchanpur (10 cases), Kathmandu (8 cases) and Kapilbastu (6 cases) district.

No death from SARI is reported this week. 10 deaths from SARI are reported so far this year. Eighty two deaths from SARI were reported in 2017.

1.3 Enteric Fever

21 cases of Enteric fever are reported this week, 3 from Sindhupalchok, 3 from Lamjung, and two each from Siraha and Gorkha district. Three deaths from Enteric Fever were reported in 2017.

1.4 Malaria

No case of Malaria is reported so far this year. Ninety one cases of Malaria are reported through EWARS in 2017.

1.5 Dengue

No case of Dengue is reported this week. Four cases of Dengue including one death are reported so far this year. 1201 cases of dengue are reported through EWARS in 2017.

1.6 Kala-azar

Two cases of Kala-azar are reported this week, one each from Lumbini Zonal Hospital, Rupandehi and District Hospital, Sarlahi. The cases are from Rainadevi chhahara Rural Municipality of Palpa district and Ishwarpur Municipality of Sarlahi district respectively. Eighteen cases of Kala azar are reported so far this year.

Two hundred twelve cases of Kala-azar were reported through EWARS in 2017.

1.7 Scrub Typhus

One case of Scrub Typhus is reported this week from United Mission Hospital, Palpa and the case is from Rambha Rural Municipality of Palpa district. Seven cases of scrub typhus are reported so far this year. 451 cases of Scrub Typhus were reported through EWARS in 2017.

Timeliness & completeness of reporting from sentinel sites:

Site Code	Sentinel Sites	Timeliness (This Week)	Completeness (%)	Site Code	Sentinel Sites	Timeliness (This Week)	Completeness (%)
101	Mechi ZH, Jhapa	On Time	100	135	DH, Sindhuli	On Time	100
102	Koshi ZH, Morang	On Time	100	136	DH, Illam	On Time	100

						Excellent (>80)	
						Satisfactory (50-79)	
						Bad(<50)	

Acknowledgement

The Epidemiology and Disease Control Division highly acknowledges the contribution from all the medical recorders, EWARS focal persons, rapid response team members and support from WHO for preparation of this bulletin.

Note: EWARS reporting form (in MS Excel format) is available at EDCD's official website www.edcd.gov.np . This bulletin is also available at the website.
